

# Site Superintendent

## Tectonic Infrastructure Inc. – Toronto, Ontario

We are a general contractor in the Greater Toronto Area. We have been in business since 1995 engaged in the construction of heavy civil infrastructure and site servicing across Ontario. We specialize in municipal road, sewer and watermain construction. Our current management team includes Professional Engineers and Certified Engineering Technicians. We are seeking an experienced individual to join our team as a Site Superintendent. We offer a competitive salary that is commensurate with experience, a performance bonus and excellent benefits. We are seeking an ambitious and highly motivated individual. The position provides great opportunity for career growth and advancement within the organization.

### Responsibilities:

- Organize, coordinate and supervise the work of employees and sub-trades throughout the different phases of the project communicating strategies and expectations.
- Ensure that the constructive effort is undertaken in accordance with the project schedule and budgets.
- Maintain accurate project documentation including the daily site diary, as built drawings, accident reports, delivery slips, utility stakeouts, etc.
- Ensuring that appropriate inventories of materials are maintained on the jobsite at all times.
- Report progress and site based activities to the project manager on a daily basis.
- Work closely with the Project Manager and promptly advise as to any anticipated delays and/ or changes in the work.
- Undertake, and/or co-ordinate, the necessary inspections and testing to ensure that the constructed work is compliant with the contract drawings and specifications.
- Ensure that all work is undertaken in accordance with the requirements of the OHSA and corporate safety policies and procedures.

### Qualifications:

- Demonstrated experience as a superintendent in the road, sewer and water main construction sectors, 5-10+ years preferred.
- Proven record of success coupled with leadership and effective decision making abilities.
- Working knowledge and understanding of all aspects of heavy civil construction.
- Trade or engineering background with additional health and safety training and education desirable.
- Excellent communication, time management and organizational skills.
- Knowledge and ability to interpret contract drawings and specifications.
